

LAPORAN DESAIN WEBSITE

Dosen Pengampu:

Vearen Dika Sofirudin, S.pd., M.ed.

Disusun Oleh:

Nama: Adinda Putri Utami

NIM: K3524002

Kelas: B

A. Judul

Penerapan HTML & JavaScript pada Kalkulator dan Efek Highlight Teks

B. Tujuan Praktikum

Praktikum ini bertujuan agar kita dapat memahami cara membuat elemen interaktif pada halaman web menggunakan HTML dan JavaScript. Serta mampu membuat kalkulator sederhana untuk operasi matematika, serta fitur highlight teks yang berubah warna saat tombol ditekan untuk membantu memahami manipulasi DOM (Document Object Model).

C. Alat dan Bahan

1. Laptop / Komputer
2. Vscode (text editor)
3. Browser (google chrome)
4. Kode/program html & CSS

D. Ringkasan Materi

JavaScript adalah bahasa pemrograman yang berjalan di browser dan berfungsi untuk memberikan logika serta interaksi pada halaman web. Dengan JavaScript, kita dapat memproses input pengguna, melakukan perhitungan, mengubah tampilan halaman secara dinamis, dan mengontrol elemen-elemen HTML melalui DOM (Document Object Model).

Pada materi ini dipelajari dua penerapan sederhana JavaScript dalam web:

1. Membuat kalkulator sederhana
Menggunakan elemen `<input>` untuk memasukkan angka dan `<button>` untuk memilih operasi. JavaScript digunakan untuk menghitung hasil penjumlahan, pengurangan, perkalian, atau pembagian dan menampilkannya ke halaman tanpa reload.
2. Highlight teks menggunakan class toggle
Menggunakan JavaScript untuk menambahkan atau menghapus kelas CSS secara otomatis. Ketika tombol ditekan, paragraf berubah warna, huruf menebal, dan

background berubah. Teknik ini menunjukkan bagaimana JavaScript dapat memanipulasi elemen HTML untuk membuat tampilan interaktif. Melalui pembelajaran ini, kita memahami dasar interaksi antara HTML, CSS, dan JavaScript dalam pembuatan halaman web. HTML mengatur struktur, CSS mengatur tampilan, dan JavaScript memberikan fungsi dinamis sehingga web menjadi lebih responsif dan user-friendly.

Output Program:

PTIK FKIP UNS

The The Faculty of Teacher Training and Education, Sebelas Maret University, Surakarta is an Educational Personnel Education Institution (LPTK) which has 24 study programs in 6 majors. Each study program has its own characteristics in producing superior, strong and intelligent educational staff.

The Informatics and Computer Technology Education (PTIK) study program is planned to take shelter in the management of the Engineering and Vocational Education (PTK) department. This placement revises our previous statement, where the PTIK study program is under the P.MIPA department. PTIK is a study program that will produce graduates who are prioritized to teach in vocational/vocational programs. So, it would be better if PTIK was under the PTK department which oversees vocational programs such as Building Engineering Education, and Mechanical Engineering Education. To meet the needs of lecturers in the field of information technology that cannot be met by the PTK department, PTIK will conduct resource sharing with the mathematics study program.

Highlight Paragraf

PTIK FKIP UNS

The **The Faculty of Teacher Training and Education, Sebelas Maret University**, Surakarta is an **Educational Personnel Education Institution (LPTK)** which has 24 study programs in 6 majors. Highlight Paragraf

F. Langkah

A. Praktikum Latihan1

- Membuat file HTML bernama latihan1.html
- Membuat input untuk angka pertama dan kedua

```
latihan 1.html X  Untitled-1  latihan 2.html
E: > SEMESTER 3 > DESAIN WEB > JAVA SCRIPT > latihan 1.html > html
1  <!DOCTYPE html>
2  <html>
3  <head>
4  |   <title>Kalkulator Sederhana</title>
5  </head>
6  <body>
7  |   <h2>Kalkulator Sederhana</h2>
8
9  |   <label>Angka 1:</label>
10 |   <input type="number" id="a"><br><br>
11
12 |   <label>Angka 2:</label>
13 |   <input type="number" id="b"><br><br>
14
```

- Menambahkan tombol operasi (+, -, *, /)

```
14
15 |   <button onclick="hitung('+')>Jumlah (+)</button>
16 |   <button onclick="hitung('-')>Kurang (-)</button>
17 |   <button onclick="hitung('*')>Kali (*</button>
18 |   <button onclick="hitung('/')>Bagi (/)</button>
19
```

- Menambahkan fungsi JavaScript untuk memproses operasi

```
22 |   <script>
23 |       function hitung(op) {
24 |           let x = parseFloat(document.getElementById("a").value);
25 |           let y = parseFloat(document.getElementById("b").value);
26 |           let result = 0;
27
28 |           if (op === "+") result = x + y;
29 |           if (op === "-") result = x - y;
30 |           if (op === "*") result = x * y;
31 |           if (op === "/") result = x / y;
32
```

- Menampilkan hasil perhitungan di halaman web

Htmlnya:

```
19
20 |   <h3>Hasil: <span id="hasil"></span></h3>
21
```

Java script:

```
33 |           document.getElementById("hasil").innerText = result;
34 |       }
35 |   </script>
36 </body>
37 </html>
```

- Terakhir simpan dan hasilnya akan seperti berikut:

10     font-family: Arial, sans-serif;
11     margin: 40px;
12     line-height: 1.6;
13   }
14
15   h1 {
16     text-align: left;
17     font-size: 28px;
18     margin-bottom: 10px;
19   }
20
21   .highlight {
22     color: red;
23     background-color: yellow;
24     font-weight: bold;
25   }
26

```

- Menambahkan tombol Highlight

```

26
27   button {
28     padding: 8px 15px;
29     font-size: 14px;
30     margin-top: 10px;
31     cursor: pointer;
32   }
33 </style>
34 </head>
35 <body>

```

- Menggunakan JavaScript classList.toggle() untuk efek klik

```

55   <button onclick="toggleHighlight()">Highlight Paragraf</button>
56 <script>
57   function toggleHighlight() {
58     let spans = document.querySelectorAll('span');
59     spans.forEach(function(span) {
60       span.classList.toggle('highlight');
61     });
62   }
63 </script>
64 </body>
65 </html>

```

- Menulis paragraf profil PTIK

```

34 </head>
35 <body>
36 <h1>PTIK FKIP UNS</h1>
37 <p id="paragraf">
38   The <span>The Faculty of Teacher Training and Education, Sebelas Maret University</span>, Surakarta is an

G. Kesimpulan

Berdasarkan praktikum yang sudah dilakukan dapat disimpulkan bahwa pengembangan halaman web tidak hanya bergantung pada struktur dasar HTML, namun juga memerlukan dukungan JavaScript untuk menciptakan interaksi dinamis di dalamnya. HTML berperan sebagai kerangka utama dalam menampilkan elemen-elemen seperti teks, tombol, dan input, sedangkan JavaScript memberikan kemampuan untuk mengolah data secara langsung di browser, merespon tindakan pengguna, dan memperbarui tampilan halaman tanpa harus memuat ulang (refresh).

Melalui latihan kalkulator sederhana, mahasiswa memahami cara JavaScript mengolah input angka, menjalankan operasi aritmatika, dan menampilkan hasil secara real time. Pada latihan highlight paragraf, penggunaan `classList.toggle()` menunjukkan bagaimana JavaScript dapat memanipulasi elemen HTML dengan menambah atau menghapus class CSS secara dinamis.

Secara keseluruhan, praktikum ini memberikan pemahaman menyeluruh bahwa kombinasi HTML, CSS, dan JavaScript merupakan dasar penting dalam proses pembuatan aplikasi web modern dan menciptakan halaman yang informatif, interaktif, dan responsif sesuai kebutuhan pengguna.
